

Specialty Steel Inc
Project Manager Full Time in Debert, NS

Position:

Project Manager

Location:

Debert, NS

Thinking about a change? Are you an experienced **Project Manager, Engineer or Certified Engineering Technologist** looking for your next opportunity? Great, because we have it! We have an exciting and rewarding opportunity for a driven and qualified candidate to join our enthusiastic and dedicated team to help us provide continued professionalism and high standards to our customers.

Company Description

We are a metal fabrication company operating in Debert, *just 10 minutes outside of Truro – the hub of Nova Scotia*, that specializes in custom stainless steel, aluminum, and metal products. We have committed 35+ years to supplying our customers with quality products with on-time delivery schedules to meet or exceed their requirements. We specialize in solving unique problems with unique solutions. We recognize that the construction industry is changing at a rapid pace and we continually strive to be at the forefront. We develop creative solutions for complex problems on many exciting projects.

Role and Responsibilities

In this role you will see projects through to fruition; you will be entrusted to estimate, plan, and oversee projects from start to finish in a timely and cost-effective manner. Effective communication with superior collaboration abilities will be key to your success. Preference will be given to applicants with a minimum of 5 years project management and CAD experience.

You are all about prioritization; while everyone else is focused on their individual tasks, you have an eye on the larger goals, and have a detailed road map for how to meet those aspirations. When others work with you, they know that deadlines will not slip, and details will not get missed. As a natural leader, you are happiest when everyone is moving in the same direction, and you never hesitate to step up and get others the answers they need. You have clear communication skills and can effectively wield those skills to make sure clients and production team are kept in the loop. You can easily manage multiple tasks without getting frazzled and are eager to take on some of the biggest and most exciting projects in the province.

If this sounds like you, we want to hear from you!

Knowledge and skill requirements:

- Experience with steel, aluminum, and stainless steel are a definite asset.
- Superior working knowledge of Solidworks CAD (or similar 3D software).
- Ability to read and interpret architectural drawings and blueprints.
- Knowledge of raw material, production processes, quality control and other methods for maximizing the effect of manufacturing products.
- Excellent organizational and administrative abilities with strengths in planning and attention to detail.

This is a permanent full-time position offering a competitive salary. Following the successful completion of a 3-month probationary period there will be a wage review and you will be offered a comprehensive benefit package.

Job Type: Full-time (40hrs/week)

Working Hours: Monday – Thursday 7:00am – 5:15pm

Benefits: Competitive Salary based on knowledge and experience,
reviewable after 3 months probation
Full Benefits after 3 months
Work/Life Balance – 4 Day Work Week, 3 Day Weekend!
Participation in Retirement Profit Sharing Plan after 1 Year
